Our service flow

We have developed adjusted more structured approach to software development following Agile methodology to ensure ultimate satisfaction of our clients.

Our 8-step service flow, designed to ensure precision and efficiency in delivering tailored software solutions.

We will guide through digitalization process to make it effortless. From defining your business needs to delivering ready to use solution made exclusively for you, we will take care of everything.

1

BRIEF
Together we discuss your ideas, your tech needs or your wish to digitalize your business

2

BUSINESS ANALYSIS
We define your business needs, identify how digitalization can support your business and we propose a variety of solutions that will best fit all needs of your business. Together we agree on a specific solution.

3

FUNCTIONAL SPECIFICATION
Our team constructs a detailed proposition of a solution for your business needs. We will draft the document with every single functionality that will be available to you and your business.

4

PROJECT MANAGEMENT
We assign a Project Manager who will create a Project Team of IT industry experts to work on a tailor-made solution for you. Your Project Manager will regularly inform you on the progress and ensure your needs are well understood and addressed by the Project Team.

5

IT DEVELOPMENT
Our team of IT experts develops a solution that will include all the functionalities that are required to address your business needs and you have previously approved. If applicable, as soon as one set of functionalities is ready and can be used, it will be delivered to you.

6

USER TESTING
Our company is following Agile project methodology ensuring high level of flexibility. When you perform your testing, you can share with us anything that you feel doesn't work as expected or you would simply like it more done differently and our team will rework it for you.

7

PRESENTATION
Our Team makes sure to present how your new tool works and everything it can do. We will organize a training for you and your team, and also prepare a thorough documentation to support users of your new tool.

8

DELIVERING
At Moselle Connect we are dedicated to equip you with a solution that will lead to your utmost satisfaction. Once you are completely satisfied with the product we developed for you, and you feel that you and your team are ready to use it, you are becoming its new and exclusive owner.

# Moselle Connect is your digitalization one stop shop!

BRIEF

Objective: To understand the client's goals, challenges, and business needs.

What happens: We schedule an in-depth discussion to explore ideas and define how digital solutions can optimize your business operations.

Outcome: A clear understanding of the problem or opportunity you're addressing, forming the foundation of the project.

BUSINESS ANALYSIS

Objective: Identify the core business needs and propose suitable digital solutions.

What happens: We conduct a thorough analysis of your business processes, uncovering pain points and areas where digital transformation can have the most impact.

Outcome: A variety of tailored solution options that align with your business strategy and market trends.

FUNCTIONAL SPECIFICATION

Objective: Define, document and agree on detailed functionalities of tailored solution to be build in order to address client's business needs.
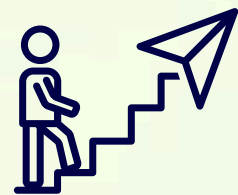

What happens: Our team drafts a detailed document specifying the exact functionalities your custom solution will include. This ensures every aspect is tailored to your business goals and aligned with the vision.

Outcome: A well-structured plan that serves as a blueprint for development.

PROJECT MANAGEMENT

Objective: To ensure smooth project execution with full transparency and regular updates.
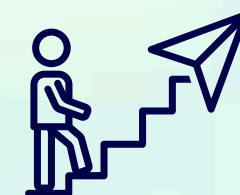

What happens: A dedicated Project Manager assembles a team of experts to develop a software solution tailored to your functional requirements, managing the process, regularly updating progress, and ensuring costs and timelines align with your expectations.

Outcome: Well-managed timelines, regular communication, and a project that stays on track, with the project manager as your main point of contact.

IT DEVELOPMENT

Objective: Build a scalable, reliable, and efficient digital solution.
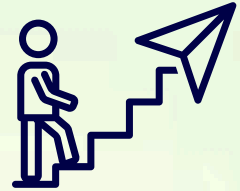

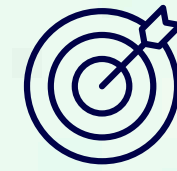

What happens: Our developers create the software solution, ensuring all functionalities are in place and that the system is secure and scalable for future needs.

Outcome: A robust and tailored solution that is ready for testing.

USER TESTING

Objective: Ensure the solution works as expected in real-world conditions.

What happens: We use Agile methodology to incorporate feedback from real users, refining the solution based on your team's needs. Our flexible testing approach ensures that your system works flawlessly before full deployment.

Outcome: A thoroughly tested solution that meets business needs and user expectations, optimized for your environment.

PRESENTATION

Objective: To present the finished product and ensure your team is fully prepared to use it.
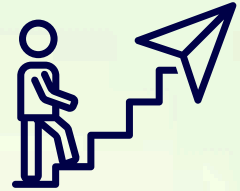

What happens: We present the final solution, highlighting key features and functionalities. A tailored training session is organized to ensure a smooth handover, empowering your team to fully utilize the new tool.
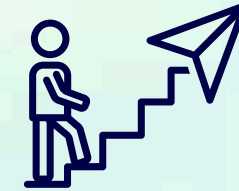

Outcome: A well-informed team, ready to adopt the new solution confidently.

DELIVERING

Objective: Ensure the solution integrates seamlessly into your operations with ongoing support.

What happens: We deploy the solution into your live environment and offer full technical support post-launch, including monitoring and updates.

Outcome: A successfully delivered solution that helps you achieve your business goals, with ongoing support and improvements available.

Software Engineering Overview

Custom Solutions for Business Success

Introduction

</> Elevating business efficiency and driving results across platforms.
</> Full-spectrum development: **Web, Desktop, Mobile, AI-driven innovations**.

Technologies We Use

</> Broad technology expertise, specializing in **C#, Python, Java, JavaScript, React, and Data Science**.

High-quality solutions for a competitive edge.

Application Types

Web Applications

Scalable, secure, and responsive designs.
Streamlines complex processes and integrates with your systems.

Desktop Applications

Powerful, productive solutions for your unique business needs.
Intuitive interfaces, enhanced team collaboration, and error reduction.
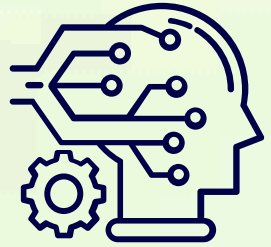

Mobile Applications

Engaging iOS and Android apps for seamless user experiences.
Designed for customer loyalty and competitive advantage on the go.

Advanced solutions and legacy support

AI Solutions

**Machine learning, NLP**, and **predictive analytics** for data-driven decisions.
Automates repetitive tasks, providing insights and **optimizing performance**.

Microsoft Office automation

Custom **automation** in **Excel, Word, and Outlook.**
Streamlined tasks, integrated data sources, and enhanced productivity.

Legacy system maintenance & upgrades

Keep your older systems reliable, secure, and scalable.
Transform legacy codebases into modern solutions while retaining core functionality.

Our Team of Experts
Expertise You Can Trust

Experienced Professionals in Key Fields:

Web Development: Experts in scalable, secure web applications.

Desktop Application Development: Designers of efficient solutions for enhanced productivity.

Mobile Development: Skilled in iOS and Android for high-performance apps.

AI & Data Science: Proficient in machine learning, NLP, and analytics.

Microsoft Office Automation: Specialists in VBA and Office Add-ins for customized automation.

Dedicated to Your Success

Collaborative, results-oriented approach to every project.

Commitment to quality, security, and delivering impactful solutions.

Why Choose Us?

Our team's diverse expertise ensures that your project is handled by professionals with deep, relevant knowledge, providing you with innovative, efficient, and reliable software solutions.
